

Vision

To be leading business organization both recognized on a domestic and foreign market, specialized in the supply of products and services concerned with engineering, design, erection, and overhaul of power and industrial plants which differs from its competition by the quality and responsibility.

Mission

To create and supply products and services which shall comply with the needs and expectations of our clients, and to accomplish business results which shall satisfy expectations of our owners, employees, partners and society.

Integrated management system policy

The quality policy forms an integral part of MONT-R Ltd s business policy and the frame for defining quality objectives. It is based on establishing and maintenance of the integrated quality management system (ISO 9001:2015), environmental management (ISO 14001:2015) and occupational health and safety system (OHSAS 18001:2007) their purpose is to satisfy requirements, needs and expectation of all interested parties (customers, buyers, employees, environment and society) and to constantly improve and increase effectiveness and efficiency of the complete business system.

The following target performances of the established management system are determined:

- Quality, safe, timely and reliable supply of products and services which completely satisfy customer requirements, needs and expectation;
- Performing its business activities in compliance with the valid statutory provisions including environmental and occupational health and safety regulations.
- Managers and all employees build an atmosphere of teamwork, trust and mutual belonging to the company with continuous improvement of all three integrated management systems following the standard requirements.
- Activity planning in all business processes, rational use of resources and power, decrease and elimination of the use of hazardous materials and controlled waste handling
- Identification of all environmental aspects to prevent its pollution and provide continuous improvement of the environmental management system
- 0-level of work-related deaths and injuries which can result in a permanent disability and 0-level of lost time due to work-related injuries
- Decision making based on facts
- Improvement of supplier quality and creation of partnerships
